Aims

The 4th international Artificial Vision Conference is organized by the Laboratory of Artificial Vision and Automatic Systems (LVAAS) and the Faculty of Electrical and Computer Engineering, MouloudMammeri University, Tizi-Ouzou, Algeria
The objective of the conference is to bring together researchers, academics, industry experts to exchange knowledge and discuss current issues for a mutual understanding of the latest scientific developments and technological innovations in the fields of artificial intelligence and machine vision, in particular.
This meeting also is an opportunity to promote exchanges between the university and other industrial and economic sectors concerned by these fields.
The submitted paper must present an**original work**in theoretical or applied aspect and fall within one of **the following themes**:

Themes

Deep Learning, Robotic Vision, Pattern Recognition, Biometrics, Image Processing, Automatic Classification, Visual Servoing, Metaheuristics, Multi-Agent Systems, Various Applications of Artificial Vision and Image Processing in Industry, Medicine, Agronomy, Biology, etc.

Important deadlines

Paper submission deadline:**10October 2021**
Notification of acceptance from:**02 November 2021**
Conference dates:**21-22-23 November 2021**

Paper submission

Authors are invited to send the full text of the article in English under A4 format in Pdf or Word, without exceeding 8 pages, including figures and tables. The text will be presented according to the IEEE format (A4 double column, in Times New Roman, font 10).
